

*Tip Top Electronics* is a small company based in Sofia, Bulgaria, which specialises in the sale and maintenance of **cash registers** and payment devices. The company has been operating since 2009.

From the very beginning, it has been managed only by one man. He was 22 years old when he decided to launch his own business, because he couldn't find a job after his graduation. Now the company employs two more people.

Its core business is the sale and maintenance of cash registers, electronic scales, fiscal printers, **POS terminals** and any related accessories.

For more than 9 years the company has strived to provide fast, quality and adequate service support for all kinds of devices.

It is also important to stay on top of any legal changes in the fiscal system in order to be able to sell equipment in line with the current legislation.

In the near future, "Tip Top Electronics" is planning to offer its customers deliveries and servicing of clients' devices at their own premises at convenient times.

The service will be available 24 hours a day, 7 days a week.

## Glossary

- **Cash register:** a device for registering and reporting sales of goods or services by issuing fiscal receipts and serving to store the data on the registered turnover in the fiscal memory.
- **POS terminals:** A point of sale terminal is an electronic device used to process card payments at retail locations.
